### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. William Hogg, Esq. on September 17, 2004.

The application has been amended as follows:

**Non-Elected Claims 1-10 have been canceled.**

### **Reasons for Allowance**

The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach or fairly suggest a method for removing matter from a liquid medium comprising the combination of steps recited in claim 1, including, but not limited to, providing a device for capturing and removing particulate matter from a liquid medium comprising: a hollow tubular member, an agitator disposed in said hollow tubular member and a particle capturing member slidably mounted on said tubular member and movable from a particulate retaining position to a particulate discharging position.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 1-10, drawn to a Device for Capturing and Removing Particulate Matter from a Liquid Medium, classified in class 210, subclass 523.
- II. Claims 11-20, drawn to a Method for Removing Particulate Matter from a Liquid Medium, classified in class 210, subclass 803.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Group II and Group I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice another and materially different process, such as in the cultivation of microorganisms

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

During a telephone conversation with Mr. William Hogg on September 17, 2004 a provisional election was made without traverse to prosecute the invention of Group II, claims 11-20. Affirmation of this election must be made by applicant in replying to this Office action. Claims 1-10 withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert J Popovics whose telephone number is (571) 272-1164. The examiner can normally be reached on Monday through Friday between 2:00 PM and 6:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Duane Smith can be reached on (571) 272-1166. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
